

360° CLOSE QUARTER DEFENSE VEHICLE AMBUSH RESPONSE

Hosted by the Abbotsford Police - May 19-23, 2025 in Abbotsford, BC. Canada

This course is for any law enforcement officer looking to increase their ability to defend from close quarter attacks, especially when seated inside their vehicle.

It is also for any law enforcement instructors looking to sharpen their delivery for use of force training and specifically this system, to be more inline with the research. This course will show the concepts and principles for instructors to take the system back to their agencies and apply them in a way that most benefits their officers.

The 360° CQD (Close Quarter Defense) system is the only method we are aware of for responding to an ambush with aimed fire in 360 degrees while seated and fixed inside of a vehicle.

The system excels when you are inside of a vehicle and in other close quarter environments. It has been taught during in-service to patrol, surveillance and special team units with great results.
