

# RESEARCH GROUNDED TRAINING DESIGN & DELIVERY FOR LAW ENFORCEMENT

April 9 to 11, 2025 in Williamsport, PA - Hosted by Williamsport P.D.

This course focuses on the practical application of the latest evidence-based methods for effective law enforcement instruction, using live fire and scenario-based training.

While this course is designed for law enforcement instructors, it's open to all officers seeking to improve their performance and critical thinking. It will focus on use-of-force situations, helping officers enhance their decision-making abilities and refine their skills.

Students will experience and learn specific principles and techniques for facilitating drills and scenarios. They will learn when and how to provide effective feedback in a manner that helps guide their officers toward self-diagnosis and correction.

This course will cover how to apply these techniques across all levels of officer experience, from recruits to senior officers, as well as high performers and specialized teams, such as SWAT.

Students will leave with an understanding of how small changes in their training programs can lead to significant improvements in officer performance on the street.
